ABSTRACT

In 1990-91, over 75,000 surveys were administered to Austin Independent School District (AISD), Texas, high school students. elementary school and secondary school teachers and administrators, other school professionals, and parents of students. These surveys gave respondents a chance to express their views on the AISD, and provide insight into the effectiveness of program and improvement activities in the AISD. The survey results are discussed in terms of the following topics: (1) school quality and effectiveness; (2) school safety; (3) district strengths and weaknesses; and (4) parent involvement. Overall, all responding groups were positive in their perceptions of the quality and effectiveness of AISD schools. All respondents agreed that school staff members believe in students' ability to achieve academically. All groups agreed that the schools are safe and secure places to learn. Students reported that they are satisfied with the involvement of their parents in their education; however, teachers at all levels believe that parents' lack of interest is one of the district's biggest problems. Students considered student lack of interest and truancy the biggest problem the district faces; most teachers and administrators are pleased with dropout prevention efforts. Teachers are generally satisfied with the instructional leadership of principals, inservice training and staff development, and the fairness of job appraisals. Twenty-four figures illustrate the survey findings. Five appendices with nine tables contain more specific survey results. (SLD)

AISD on AISD: Reflections on the State of the District--1990-91 Districtwide Surveys Executive Summary

Austin Independent School District Department of Management Information Office of Research and Evaluation

Author: Sedra G. Spano

Program Description

In 1990-91, over 75,000 surveys were administered to AISD high school students, elementary and secondary teachers and admi. istrators, other campus professionals, and elementary and secondary parents. The information provided through these efforts serves to:

- a) Provide AISD students, staff, and parents a means for expressing their views on key issues; and
- b) Provide meaningful insight into the effectiveness of program and improvement activities currently implemented within AISD.

Topics discussed in this report include:

- School quality and effectiveness,
- School safety,
- District strengths and weaknesses, and
- · Parent involvement.

Major Findings

- 1. High school students, elementary and secondary teachers and administrators, and elementary and secondary parents are positive in their perceptions of the quality and effectiveness of AISD schools. (Pages 2, 6, 7, 16, and 24)
- 2. Students, teachers, administrators, and parents agree that school staff believe in students' ability to achieve academically. (Pages 8, 10, and 19)
- 3. Students, teachers, administrators, and parents believe that AISD schools are a safe and secure place to learn. (Pages 2, 3, 8, 12, 14, and 24)
- 4. Students report that they are satisfied with the involvement of their parents in their education; however, teachers at all levels believe that parents' lack of interest is one of AISD's biggest problems. (Pages 3, 4, 12, 22, and 25)

- 5. Sudents report that pupils' lack of interest/truancy is the biggest problem with which their schools must deal. Use of drugs, the biggest problem listed in 1989-90, was not rated as one of the top five biggest problems in 1990-91. (Pages 5 and 6)
- 6. Most AISD teachers are satisfied with their principal as an instructional leader, with the staff development and training they receive on their campus, and with the fairness of job appraisals. (Pages 19 and 20)
- 7. While most of AISD's high school students say "no" to a career in teaching, most AISD teachers see teaching as a long-term career. (Pages 12, 13, and 23)
- 8. Most AISD teachers and administrators are pleased with the District's dropout prevention efforts. (Pages 21 and 22)

AISD ON AISD: Reflections on the State of the District-1990-91 Districtwide Surveys

FINAL REPORT

Introduction

The Austin Independent School District has conducted survey research with students, employees, and parents since the 1979-80 school year. The information provided through this effort serves not only to provide students, staff, and parents a means for expressing their views on key issues but also to provide meaningful insight into the effectiveness of programs and improvement activities currently implemented within AISD. The survey results are used by school leaders, such as principals or department heads, program directors, and other District professionals in understanding the strengths and weaknesses of various programs and policies of interest to AISD.

This report will be organized into four sections:

- o Trends/conclusions (section 1),
- o Students (section 2),
- o Teachers, administrators, and other professional employees (section 3), and
- o Parents (section 4)

Each section will report longitudinal information on a variety of key issues such as school climate/effectiveness, school quality, strengths and weaknesses, and parent involvement. More detailed information is contained in each of five appendices:

- o Appendix A contains a three-year summary of survey characteristics
- o Appendix B contains a description of the item selection process
- o Appendix C describes the nature of the surveys
- o Appendix D contains a chart of the anonymous employee survey results for the past three years
- o Appendix E contains charts of the elementary and secondary survey results for the past three years

This report serves both to present the current year's survey data and to provide longitudinal survey results from the past two to five years. In some situations, a chi square test of significance was used to compare 1990-91 results with 1989-90 results. The term "significantly more positive," as used in this report, indicates that the distribution of responses in 1990 were more positive than those given in 1989 based on the chi square test. It is important to note, however, that statistical significance on the chi square test does not necessarily indicate that the observed changes from 1989-90 to 1990-91 are meaningful in a practical sense. For example, a 1% or 2% increase in an "agree" response from one year to the next on a particular student item may be chi square significant with a large number of respondents, but may not represent an important trend in student responses.

TRENDS/CONCLUSIONS

Students, teachers, administrators, and parents were asked similar questions in each of the following areas:

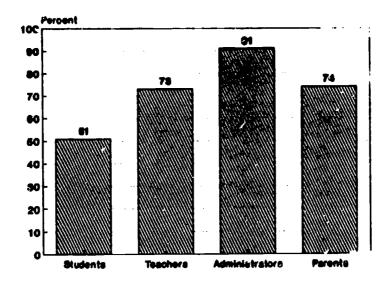

- o School quality
- o School safety and security
- o Strengths and weaknesses
- o Parent involvement

This section will present a synthesis of responses in 1990-91 across groups in the above areas.

School Quality

High school students, teachers, administrators, and parents are positive in their perceptions of the quality and effectiveness of AISD schools.

RESPONSES OF EXCELLENT OR ABOVE AVERAGE TO "THE QUALITY OF MY SCHOOL IS..."

Additional information on school quality and effectiveness can be found on pages 6, 7, 16, and 24.

Safety and Security

High school students, teachers, administrators, and parents believe that AISD schools are a safe and secure place to learn.

6

RESPONSES TO SCHOOL SAFETY ITEMS 1990-91

| GROUP | ІТЕМ | Strongly Agree + Agree RESPONSES |
|----------------|--|-------------------------------------|
| Students | This school is a safe and secure place to learn. | 57% |
| Parents | My child's school is a safe and secure place to learn. | 90% |
| Teachers | Our school has a safe climate. | 88% |
| Administrators | Our school has a safe climate. | 95% |

Additional information on school safety can be found on pages 8, 12, 14, and 24.

Strengths and Weaknesses

- O High school students, teachers, administrators, and secondary parents agree that pupils' lack of interest/truancy and lack of respect of teachers/other students are among the biggest problems in AlSD's schools. Elementary parents are most concerned with large class size.
- o High school students and parents report that quality teachers are among AISD's greatest strengths.

Additional information on District strengths and weaknesses can be found on pages 5, 6, 17, 22, and 24.

Parent Involvement

Students and parents are satisfied with the amount of parent involvement in AISD, however, teachers at all levels report that parents' lack of interest is one of AISD's biggest problems.

RESPONSE TO ITEMS RELATED TO PARENT INVOLVEMENT 1990-91

| GROUP | ITEM | % | RESPONSE |
|-----------------------|---|----------|--|
| Students | I want my parents to be more involved in my education by: | 45% | I am satisfied with the involvement of my parents. |
| Teachers | What are the biggest problems with which | 40% | Parents' lack of interest |
| | your school must deal? | 32% | Parents involvement in school activities. |
| Elementary Parents | What are AISD's greatest strengths? | 57% | Communication with parents |
| | | 44% | Parental involvement |
| Secondary Parents | How much are you involved in your son's/daughter's education? | 58% | Very involved |

Additional information on parent involvement can be found on pages 12, 22, and 25.

STUDENTS

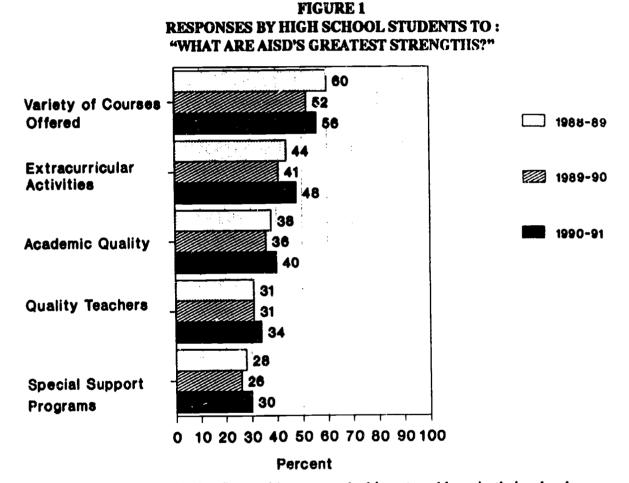

Strengths and Weaknesses

Students report that the variety of courses offered is AISD's greatest strength, while pupil lack of interest/ truency is AISD's biggest problem:

In response to the question, "What are AISD's greatest strengths?," the top five student choices were:

- 1. Variety of courses offered
- 2. Extracurricular activities
- 3. Academic quality
- 4. Quality teachers
- 5. Special support programs

These responses are consistent with the 1988-89 and the 1989-90 student responses, as shown in Figure 1.

Students reported that the following five problems were the biggest problems in their school:

- 1. Pupils lack of interest/truancy
- 2. Lack of respect of teachers/other students
- 3. Teacher's lack of interest
- 4. Fighting
- 5. Drinking/Alcoholism

Figure 2 presents a comparison of students' rankings of the biggest problems for the current year and three previous years. One notable difference in this year's responses compared to past school years' is the omission of the problem "use of drugs" which has been listed as the number 1 or 2 problem for the past three years. Drinking/alcoholism, ranked as the fourth biggest problem since 1988-89, has dropped to fifth this year. Another difference from past years is the appearance for the first time of "teachers' lack of interest" among the five biggest problems (see Figure 2).

9

5

FIGURE 2 FOUR-YEAR COMPARISON OF TOP FIVE RESPONSES BY HIGH SCHOOL STUDENTS TO: "WHAT DO YOU THINK ARE THE BIGGEST PROBLEMS WITH WHICH YOUR SCHOOL MUST DEAL?"

| YEAR | PROBLEM | RANK | |
|---------|---|-------------|--------------------|
| 1967-88 | Use of Drugs Pupils' Lack of Intere (*ancy Lack of Respect of Tea_hers/Other | 1 2 | 39% 34% |
| | Students Fighting Lack of Discipline | 3 4 5 | 26% 23% 23%* |
| YEAR | PROBLEM | RANK | 94 |
| 1988-89 | Pupils' Lack of Interest/Truancy Use of Drugs Lack of Respect of Teachers/Other | 1 2 | 33% 30% |
| | Students Drinking/Alcoholism Fighting | 3 4 5 | 27% 21% 21%* |
| YEAR | PROBLEM | RANK | % |
| 1989-90 | Use of Drugs Pupils' Lack of Intertat/Truancy Lack of Respect of Teachers/Other | 1 2 | 35% 32% |
| | Students Drinking/Alcoholism Fighting | 3 4 5 | 29% 25% 21% |
| YEAR | PROBLEM | RANK | % |
| 1990-91 | Pupils' Lack of Interest/Truancy | | 34% |
| | Lack of Respect of Teachers/Other Students | 2 | 31% |
| | Teachen' Lack of Interest Pighting Drialong/Alcoholism | 3 4 5 | 21% 21%* 20% |
| | L'AMINDA MARINE | | *** |

^{*} Some problems received the same percentage because of an equal number of responses or an equal percent when rounded.

School Quality

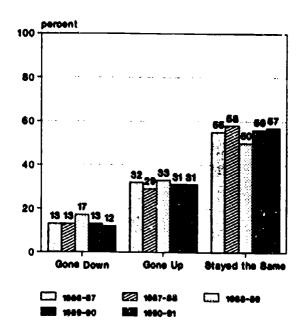

Most students report that the qualit, of their school has gone up or stayed the same from the previous year.

When asked to rate the quality of education at their school compared to one year ago, most high school students (66%) report that the quality of their school has either gone up or stayed the same. Only a small percentage of students (9%) believe that the quality of their school has gone down.

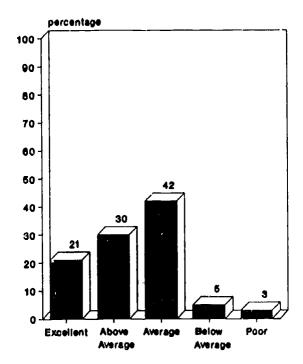

These responses follow the trend of the past four years, as shown in Figure 3.

FIGURE 3
RESPONSES BY HIGH SCHOOL STUDENTS TO:
"THE QUALITY OF EDUCATION AT MY SCHOOL HAS..."
1986-87 THROUGH 1990-91

Ninth graders were asked to rate the quality of their school on a scale from excellent to poor. Figure 4 illustrates their responses. Half (51%) of high school freshman rate their school as "above average" or "excellent."

FIGURE 4
RESPONSES BY NINTH GRADERS TO:
"THE QUALITY OF MY SCHOOL IS:"
1990-91 (N=1593)

SCHOOL CLIMATE/EFFECTIVENESS

High school students were generally positive in their perceptions about school satisfaction, discipline, and safety. Middle/junior high school students responded in a less positive manner to most items.

The middle/junior high school results were generated from a pilot survey of 6-8 grade students which was conducted in April, 1991 for the Division of Secondary Education. A sample of one third of students from each of AISD's middle/junior high schools participated voluntarily in this anonymous survey effort.

The following items concerning school satisfaction, discipline, and school safety and security, taken together, reflect student perceptions of school climate/effectiveness on their campus:

- o Most high school students (62%) report that they enjoy coming to their school (see Figure 5). Only 50% of middle/junior high school students agree with this statement.
- o Only 39% of high school students believe that their school makes students enthusiastic about learning (see Figure 6). An even smaller percentage of middle/junior high school students (33%) agree with this statement.
- o A majority of ninth graders (69%) report that teachers at their school believe that they can achieve academically (see Figure 7). Over 70% of middle/junior high school students believe this statement.
- o A majority of high school students (74%) believe their classes to be "very interesting" or "somewhat interesting" (see Figure 8).
- o Almost half (48%) of high school students agree with the statement that discipline in their school is fair and related to violations of agreed-upon rules (see Figure 9).
- o A small majority of high school students (53%) believe that most students in their school are well-behaved (see Figure 10). Only 15% of middle/junior high school students agree with this statement.
- o Most high school students (57%) report that their school is a safe and secure place to learn (see Figure 11).

Compared to student responses in 1989, high school students in 1990 were significantly more positive in their beliefs concerning the following items:

- o I enjoy coming to this school.
- o This school makes students enthusiastic about learning.
- o Discipline in this school is fair and related to violations of agreed upon rules.
- o Most students in my school are well-behaved.
- o This school is a safe and secure place to learn.

| Neutral | 32% | 31% |
| Strongly Disagree + Disagree | 16% | 13% |

PARENT INVOLVEMENT

Most students report that they are satisfied with the involvement of their parents in their education.

The top three responses (N=729) to the statement "I want my parents to be more involved in my education by..." were:

- 1. I am satisfied with the involvement of my parents (45%).
- 2. Helping me to get my homework done (18%).
- 3. Helping me relate school learning to real life (14%).

A full 95% of 9th graders surveyed (N=1724) strongly agree (84%) or agree (11%) with the statement "My parents expect me to graduate from high school."

INTEREST IN TEACHING AS A CAREER

A majority of students surveyed say "no" to a career in teaching.

Figure 12 reports student responses to the statement "I am interested in teaching as a career" for this year and last year. Responses this year are not significantly different than those given last year.

16

FIGURE 12

| Yes | 10% | 11% |
| No | 58% | 56% |
| Neutral/Don't Know | 32% | 33% |

TEACHERS AND OTHER PROFESSIONAL EMPLOYEES

The same 24 school climate/effectiveness items have been asked of AISD teachers, other professionals, and administrators for the past three years. Appendix D contains a chart of these items with results covering these three school years: 1988-89, 1989-90, and 1990-91.

This section will focus on summarizing these school climate items as they relate to school quality, discipline, District weaknesses, teacher morale and expectations, instructional leadership, and professional growth. In addition, other items which relate to teacher attitudes on dropout prevention efforts in AISD, parent involvement, and career goals will be discussed.

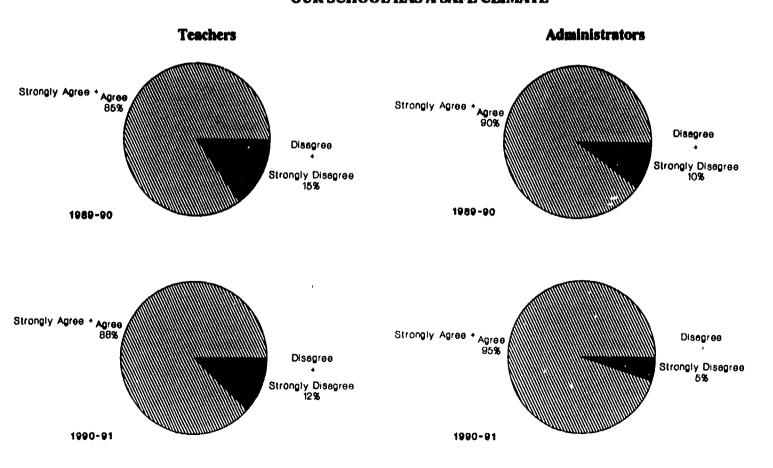

SCHOOL CLIMATE/EFFECTIVENESS

Teachers, other professionals, and administrators were generally positive in their perceptions about safety, satisfaction, discipline, and effectiveness in their schools.

School Safety

Most teachers (88%) and administrators (95%) strongly agree or agree with the statement "Our school has a safe climate" (see Figure 13). The 1990-91 responses are significantly more positive than those given in 1989-90.

FIGURE 13 RESPONSES OF TEACHERS AND ADMINISTRATORS TO: "OUR SCHOOL HAS A SAFE CLIMATE"

In response to the statement "Our school has a purposeful, business-like climate," a large majority of teachers and administrators strongly agree or agree, as shown in Figure 14.

FIGURE 14
RESPONSES OF TEACHERS AND ADMINISTRATORS TO:
"OUR SCHOOL HAS A PURPOSEFUL BUSINESS-LIKE CLIMATE"

SA+A= Strongly Agree + Agree Responses

D+SD= Disagree + Strongly Disagree Responses

Over 90% of teachers and administrators strongly agree or agree with the statement "The general school climate is conducive to learning." These responses are significantly more positive than those given last year to the same item (see Figure 15).

FIGURE 15
RESPONSES OF TEACHERS AND ADMINISTRATORS TO:
"THE GENERAL SCHOOL CLIMATE IS CONDUCIVE TO LEARNING"

A majority of feachers, other professionals, and administrators rate the quality of their schools as excellent or above average.

Most teachers, other professionals, such as counselors and librarians, and administrators rate the quality of their schools as excellent or above average. The 1990-91 responses are not significantly different from those given the past two years. See Figure 16 below.

FIGURE 16

| | 1990-91 | 47% | 44% | 7% | 2% | 0% |

Discipline

Teacher and administrator perceptions of student behavior, student-staff interactions, parental support of the school's disciplinary system, and of the overall school environment convey a positive image of discipline in AISD.

Most AISD teachers and administrators strongly agree, agree, or tend to agree that:

- o Overall, students are well behaved in their school (teachers 79%, administrators 92%).
- o There is a sense of order and discipline in their school (teachers 85%, administrators 98%).
- o Students obey their school's rules (teachers 79%, administrators 95%).
- o They are respected by their students (teachers 74%, administrators 90%).
- o Parents support the school's rules and its disciplinary system (teachers 81%, administrators 98%).

Problems in AISD

Along with students, teachers and administrators were also asked to identify their school's biggest problems. Figure 17 below highlights their responses.

FIGURE 17
TOP FIVE BIGGEST PROBLEMS IDENTIFIED BY TEACHERS AND ADMINISTRATORS, 1990-91

| Group | N | Top Five Biggest Problems |
|---------------------|-----|--|
| Elementary Teachers | 708 | Parents' lack of interest Parents involvement in school activities Lack of respect of teachers/other students Large schools/overcrowding Lack of proper financial support |
| Secondary Teachers | 682 | Pupils' lack of interest/truancy Lack of respect of teachers/ other students Parents' lack of interest Lack of discipline Parents involvement in school activities |
| Administrators | 188 | Parents' involvement in school activities Parents' lack of interest Pupils' lack of interest/truancy Lack of proper financial support Lack of respect of teachers/other students |

Morale

Elementary teachers and elementary administrators responded most positively to the statement "The morale of this staff is generally high." Teachers at the elementary and high school levels gave significantly more positive responses about their staff's morale this year than last year (see Figure 18).

FIGURE 18
RESPONSES BY TEACHERS AND ADMINISTRATORS TO:
"THE MORALE OF THIS STAFF IS GENERALLY HIGH"

| Group · | Year | Agree | Disagree |

| Secondary | 1989-90 | 76% | 24% |
| • | 1990-91 | 79% | 21% |

High Expectations/Teacher Behavior

Teachers and administrators strucely agree that school staff have high expectations for success, and that students can attain mastery of basic skills.

Almost all teachers and administrators at all levels strongly agree or agree that their school staff has high expectations for success, and most agree that their school staff believes and demonstrates that students can achieve mastery (see Figure 19).

FIGURE 19
RESPONSES OF TEACHERS AND ADMINISTRATORS TO
STATEMENTS CONCERNING TEACHER EXPECTATIONS

| Item | Responses of: | SA+A | D+SD |
|---|---------------------------|-------------|------|
| Our school staff has high expectations | Elementary Teachers | 96% | 4% |
| for success. | Middle/Junior Teachers | 94% | 6% |
| | High School Teachers | <i>3</i> 0% | 10% |
| | Elementary Administrators | 98% | 2% |
| | Secondary Administrators | 94% | 6% |
| Our school staff believes and demonstrates that all students can attain mastery. | Elementary Teachers | 93% | 7% |

| | High School Teachers | 78% | 22% |
| | Elementary Administrators | 94% | 6% |
| | Secondary Administrators | 86% | 14% |

SA+A=Strongly Agree + Agree D+SD=Disagree + Strongly Agree

Instructional Leadership

Teachers' perceptions of their school's principal are largely positive.

Most AISD teachers agree or tend to agree that:

- o Their principal is an effective instructional leader (84%).
- o Their principal is willing to discuss problems with them (90%).
- o Their decisions as professionals are supported and respected by campus administration (86%).

- o There is collaborative planning and decision making at their school (80%).
- o The channels of communication among the faculty, administrators, and other staff at their building are open and adequate (78%).
- o The resolution of conflicts or problems is addressed positively at their campus (80%).

Teacher Satisfaction/Professionalism

A majority of leachers are satisfied with the staff development/ fraining they receive at their campus. Teachers also feel that job appraisals are fair.

FIGURE 20
RESPONSES OF TEACHERS TO STATEMENTS CONCERNING TEACHER
SATISFACTION AND GROWTH AS A PROFESSIONAL

| Item | Responses of: | SA+A | D+SD |
|--|------------------------|------|------|
| My continued growth as | Elementary Teachers | 91% | 9% |
| a professional is supported by staff development/ | Middle/Junior Teachers | 89% | 11% |
| training at my campus. | High School Teachers | 82% | 18% |
| | Totals | 89% | 11% |

| actual job performance. | High School Teachers | 78% | 22% |
| | Totals | 84% | 16% |

SA+A=Strongly Agree + Agree D+SD=Disagree + Strongly Disagree

As shown in Figure 20:

- o A vast majority of teachers (89%) feel that their continued growth as a professional is supported by staff development/training at their campus.
- o Most teachers (85%) feel that job performance appraisals on their campus are fair and representative of actual job performance.

Compared to teacher responses in the 1989-90 school year, teachers responding in the 1990-91 school year were significantly more positive concerning the following school climate items:

- o Our school has a safe climate.
- o Our school has an orderly, purposeful, businesslike climate.

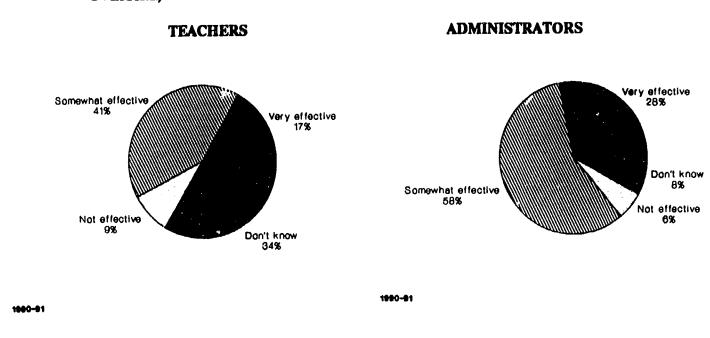

- o The general school climate is conducive to learning.
- o The morale of this staff is generally high.

VIEWS ON AISD'S DROPOUT PREVENTION EFFORTS

Overall, teachers are positive in their views about AISD's dropout prevention programs.

In response to the item "Overall, the dropout prevention programs at my school are....," 58% of teachers responded "very effective" or "somewhat effective," as did 86% of administrators. See Figure 21.

FIGURE 21
RESPONSES BY TEACHERS AND ADMINISTRATORS TO:
"OVERALL, THE DROPOUT PREVENTION PROGRAMS AT MY SCHOOL ARE..."

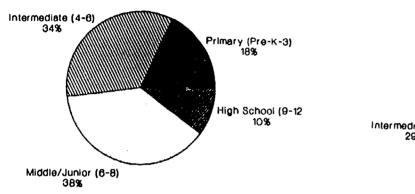

- o A majority of teachers (70%) and administrators (85%) strongly agree or agree that AISD is making serious efforts to keep students in school.
- o Most secondary teachers (72%) believe that primary dropout prevention emphasis should be during the intermediate grades (4-6) or the middle/junior high school grades (6-8).
- o Most administrators (72%) believe that primary dropout prevention emphasis should be during the primary school years (pre-K-3) or the intermediate grades (4-6). See Figure 22.

VIEWS ON PARENT INVOLVEMENT IN AISD

Most reachers and administrators in AISD agree that parent involvement in their child's education is important.

- o Almost all teachers (98%) agree or strongly agree that parent involvement is important to student success.
- o In response to the statement "Parents are actively involved on my campus in a positive manner," 71% of teachers agree or strongly agree.
- O A slight majority of teachers (51%) strongly agree or agree with the statement "The parents on my campus understand how to assist their children in learning the subject matter."
- o Most administrators (78%) responded agree or tend to agree to the statement "Parents of my students support our efforts to educate their children."
- In response to the statement "My school should do more to encourage parent involvement," 69% of administrators agree or strongly agree.

TEACHER CAREER GOALS

A majority of AISD teachers see teaching as a long-term career.

Teachers were asked to respond to the question "Which of these statements best describes your career goals at this time?" and were given the following response options:

- A. Teaching is my career; I'll teach as long as I can.
- B. Undecided; I'm considering other options.
- C. Teaching is not my career; I'll leave as soon as I can.

This school year, 76% of elementary teachers, 62% of high school teachers, and 78% of middle/junior high teachers chose response option A. See Figure 23 for a three-year comparison.

PARENTS

Elementary and secondary parents have been surveyed for the past three years concerning school issues such as school safety and security, academic quality, school effectiveness, home-school relations, strengths and weaknesses, and parent involvement. Appendix E contains charts of the elementary and secondary parent survey results for the past three years.

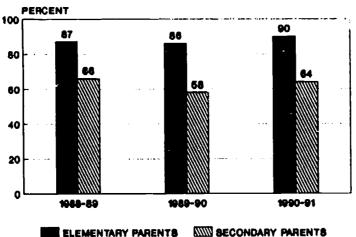

Over the three years of the secondary parent survey process the return rates have been consistently low. These low return rates call into question the viability of continuing to conduct this survey in the same manner in future years. This year's low return rate of 6% requires cautious interpretation of the secondary parent results presented here.

School Safety and Security

Most elementary and secondary parents responding to the 1990-91 parent surveys were positive in their perceptions of school safety and school quality.

In response to the item "My child's school is a safe and secure place to learn" 90% of elementary parents and 64% of secondary parents strongly agree or agree. See Figure 24.

FIGURE 24
SA+A* RESPONSES TO "MY CHILD'S SCHOOL IS A SAFE AND SECURE PLACE TO LEARN"

* Strongly Agree + Agree

School Quality and Effectiveness

With regard to academic quality and school effectiveness, parents responded as follows:

- o Most elementary parents (83%) and most secondary parents (63%) strongly agree or agree that their child's school is an effective (excellent) school.
- Over 70% of elementary parents and over 57% of secondary parents report that compared to one year ago the quality of education in their child's school has either gone up or stayed the same.
- O A majority of elementary parents (74%) and secondary parents (55%) rate their child's school as excellent or above average.

24 28

Strengths and Weaki-esses

Elementary parents report that the instructional staff is AISI)'s greatest strength, while class size is AISI)'s greatest weakness.

In response to the question "What are AISD's greatest strengths?" the top three elementary parent responses were:

- 1. Instructional staff,
- 2. Communication with parents, and
- 3. Academic quality.

The top three secondary parent responses to the same question were:

- 1. Academic quality,
- 2. Quality teachers, and
- 3. Variety of courses offered.

The following three items were identified by elementary parents as AISD's greatest areas in need of improvement:

- 1. Class size,
- 2. Dropout prevention, and
- 3. Materials/equipment.

High school parents and middle school parents responded differently to the item "What do you think are the biggest problems with which your school must deal?" See chart below.

| High School | 1. Use of drugs |
|---------------|---|
| • | 2. Parents' lack of interest/truancy |
| | 3. Lack of respect of teachers/other students |
| Middle School | 1. Large schools/overcrowding |
| | 2. Fighting |
| | 3. Lack of respect of teachers/other students |

Home School Relations/Parent Involvement

(Acceptants) and Secondary Seconds are societies in their perceptions of home school relations and parent involvement.

- Just under 80% of elementary parents report that they have a positive relationship with the staff of their child's school.
- O Just under 70% of secondary parents strongly agree that their son's/daugthter's school has positive relations with the home and school community.
- o More than half of elementary parents (64%) strongly agree or agree that they are involved as much as they want to be in their child's school.
- o Almost 60% of secondary parents report that they are very involved in their son's/daugther's education.
- o Elementary parents rated the following as the top three ways they prefer to be involved with their child's school:
 - 1. Helping my child with homework,
 - 2. Signing report cards, and
 - 3. Attending parent/teacher conferences.

APPENDIX B

Item Selection Process

Item solicitation and selection for students, professionals, administrators, and parents is collaborative because it provides a forum for decision makers who have a stake in the survey process to voice their input and concerns. The process generally involves central office personnel and ORE program staff (among others) submitting an item or a set of items. All survey items then become part of a Cabinet agenda item for comment and review. ORE staff make final decisions on item selection for each survey administered.

Students

Items were solicited from Secondary Education, ORE staff, and vocational counse ors in October, 1990. Overall, 86 items were distributed in November to 15,117 students, with 86% of all surveys returned.

Professionals

The 1990-91 professional employee survey was organized into two distinct sections: (1) 361 general items that dealt with a variety of topics like Chapter 1, TAAS, Cable TV, Spanish Academy, and middle schools; and, (2) 24 items on school climate/school effectiveness.

Survey items were solicited from elementary and secondary administrators, coordinators, other AISD departmental staff (e.g., Learning Resources, Media Production), ORE staff, principals, and Cabinet members. The same 24 school climate/effectiveness items reviewed by Cabinet in the 1988-89 school year were repeated.

ORE has developed a sophisticated, computerized system for item assignment, form generation, and processing which allows a large number of items to be included, while limiting items directed to one individual. All administrative and professional employees received 20-24 school climate items respectively; the other 361 items were randomly assigned to relevant populations. Thus, the maximum number of items per respondent was limited as shown below.

NUMBER OF ITEMS RECEIVED BY PROFESSIONALS AND ADMINISTRATORS ON THE 1991 EMPLOYEE SURVEY

BASED ON A TOTAL OF 361 SURVEY ITEMS, EACH EMPLOYEE RECEIVED BETWEEN 26-56 ITEMS:

| AD | MINI | STRATORS | PROFESSIONALS |
|---|------|----------|----------------------|
| o SCHOOL CLIMATE/SCHOOL EFFECTIVENESS ITEMS | = | 20 | 24 |
| o GENERAL/OTHER SURVEY ITEMS | = | 36 | 24 |
| TOTAL | | 56 | 48* |

* The range typifies what an administrator receiving a survey would get (20 SC/SE items with a minimum of six General Survey items = 26) and a teacher (24 SC/SE items with a maximum of 24 General Survey items = 48).

ORE Pub. No. 90.47 contains the professional and administrator surveys and results for school climate/effectiveness items.

Parents

The elementary survey was comprised of 15 items and was administered to just under 28,000 parents. The secondary survey had a total of 21 items and was administered to 26,703 parents. ORE Pub. No.90.47 contains the elementary and secondary surveys and results.

 $_{34}$ 37

APPENDIX C

Nature of the Surveys

Students

The high school student survey traditionally serves as the major means of obtaining vocational education course preference information, and all coordination efforts have been made through vocational education counselors at each campus. The need to capture additional information of interest and concern to secondary education personnel has resulted in the expansion of the survey agenda to include other topics such as honors courses, grades/grading procedures, and summer school. ORE Pub. No.90.47 contains student survey District total results.

Staff

The employee survey is designed to tap opinion from all professional staff within AISD such as teachers, other campus professionals (e.g., librarians and counselors), noncampus professionals (e.g., psychological associates), campus administrators, and central administrators. A wide range of topics of interest has been targeted to all AISD personnel or to specific groups.

Beginning in 1988-89, the survey has been administered during a faculty meeting, resulting in higher return rates than in previous years. The return rates for 1990-91 were 95%, 89%, and 94% for teachers, other professionals, and administrators, respectively.

Parents

Last year, the survey process was extended to collect all elementary parent and all secondary parent opinions. This year, as well, all elementary and all secondary parents were surveyed, totaling over 54,000 parents. Parent surveys alone accounted for 74% of the total distribution of District surveys. Topics centered around school climate, home-school relations, AISD's greatest strengths, and areas of improvement.
